TEACHING HOSPITAL

# BASIC IMMUNOLOGIST

*Center for transplantation sciences within the department of surgery*

Massachusetts General Hospital, a major Boston teaching hospital and teaching affiliate of Harvard Medical School, seeks an early-career Basic Immunologist with an interest in translational research to join the Center for Transplantation Sciences (CTS) within the Department of Surgery.

The successful candidate will have expertise in molecular and cellular immunology which could be applied in translational (preclinical) transplant research. The applicant will work collaboratively with multiple PI's conducting translational allo- or xenotransplantation research primarily in NHP models. The successful candidate will be expected to grow into a leadership role in a cutting-edge translational research program. Active participation in the recruitment, daily supervision, and education of pre-doctoral and post-doctoral trainees is integral to the position. A doctoral degree (MD or PhD) and post-doctoral laboratory experience are prerequisites.

An appointment at the rank of Assistant or Associate Professor at Harvard Medical School will be commensurate with her/his academic accomplishments.

*We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions or any other characteristic protected by law.*

Interested candidates should submit a letter of application and curriculum vitae to:
