

Applications due September 16, 2019

Michigan Life Sciences Fellow Jennifer Yeung

The University of Michigan invites researchers of exceptional promise to apply to the Michigan Life Sciences Fellows program — a unique, multidisciplinary community of scholars that provides mentorship focused on creating the next generation of leaders in the biosciences.

The award fully funds three years of mentored postdoctoral work at our nationally ranked Medical School; College of Pharmacy; College of Literature, Science, and the Arts; or the Life Sciences Institute.

\$60,000
annual stipend
+ subsidized
benefits

\$25,000 toward
independent
research + **\$2,000**
travel stipend

Formal **mentoring**
from prominent
scientists from
both within and
outside U-M

Access to resources
for **skill-building**
in areas like lab
management and
scientific writing

Who Can Apply

The Michigan Life Sciences Fellows program seeks applicants with broad intellectual interests in the biological sciences and a keen desire to pursue a career in research. Applicants must be graduate students in their final year of schooling, or graduates who are less than one year post-degree (Ph.D., M.D., Pharm.D., M.D./Ph.D., or Pharm.D./Ph.D.) at the time of application.

About the University of Michigan

The University of Michigan is a research powerhouse. With more than \$1.5 billion in annual research expenditures, we're ranked #1 in research volume among U.S. public universities by the National Science Foundation.
