GENERAL HOSPITAL

HARVARD MEDICAL SCHOOL
TEACHING HOSPITAL

IMMUNOLOGIST

Center for transplantation sciences within the department of surgery

Massachusetts General Hospital, a major Boston teaching hospital and teaching affiliate of Harvard Medical School, seeks an established Immunologist with an interest in translational research to join the Center for Transplantation Sciences (CTS) within the Department of Surgery.

The successful candidate will have expertise in molecular and cellular immunology with an interest in the mechanisms underlying immune activation and immune regulation which could be applied to the development of immunomodulatory therapies to control allo-and/or xenotransplantation rejection. The successful candidate will join the leadership of a cutting-edge translational research program. S/he must have an MD and/or PhD and a proven track record of productive laboratory research, federal funding, and effective teaching ability. S/he will also have a demonstrated track record of supervising and successfully mentoring doctoral candidates, postdoctoral fellows and junior faculty.

An appointment at the rank of Professor or Associate Professor at Harvard Medical School will be commensurate with her/his academic accomplishments.

We are an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability status, protected veteran status, gender identity, sexual orientation, pregnancy and pregnancy-related conditions or any other characteristic protected by law.

Interested candidates should submit a letter of application and curriculum vitae to:

Richard N. Pierson III, MD, Chair, Search Committee
