- Join a community of ~300 like-minded PhD students, Post-Docs, and JEI alumni ightarrowpassionate about outreach and scientific communication

ESTIGATORS

"Communicating findings is an essential part of the scientific process that scientists at every stage of their career work towards perfecting. Walking students through the steps of conducting conservative experiments, presenting results effectively, and see their ideas through to publication is an exciting process to be a part of. Having seen the creativity and guality of JEI submissions gives me a great deal of hope for the future of this field."

-Kiana Mohajeri, JEI reviewer and editor
