Teaching Fellows for Fall 2020

MCB 60

Cellular Biology and Molecular Medicine

MCB60 is a sophomore level course that provides an introduction to molecular and cellular biology and their connections to biomedicine.

Teaching fellows will facilitate discussions during lecture, lead a weekly laboratory section, grade lab reports and problem sets, hold a weekly office hour, and attend weekly staff meetings.

We are looking for graduate students or post-docs who are excited about teaching students the principles of molecular and cellular biology.

Please send your cv to
michel.becuwe@gmail.com
